1 QUOTES FOR THE FUTURE

1.1 Eduardo quotes

Do more with the same

Do the same with less

1.2 Eduardo's Digitalisation Manifesto

1 Security Each component of a digitalization venture shall consider be operational in a harsh cyber environment.

2 Workflow Without becoming a mandatory part of the process, by the functionality and not by words. A digitalization effort will turn into a useless junk of pieces and bits.

3 Evolution Plan ahead how a single entity will maintain operational capabilities with the transformation of the entire chain.

4 Process Digitalisation sometimes is not about taking one manual operation and make it in a electronic way. Most of the times is about killing that manual process.
